## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 12-13,17,19-22,30 and 31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regard to claim 12 there is no antecedent basis for the garment since the garment has not been positively claimed in combination with the support apparatus. Also a complementary fastener on a garment has not been claimed. In claim 13 it is not clear as to whether the sling ends are just “close” or “coupled”. It is first claimed as being “close” and then “coupled”. However “close” is not necessary since coupled is more than “Close” but is “connected”. In claim 17 there is not garment claimed with the support apparatus yet in (b) the suspension means is claimed as being coupled to a garment. In claim 19, line 6 the terms “displaceable or deformable” are not structurally equivalent and should not be claimed in the alternative. In regard to claims 20 and 21 it is not clear as to how the sling compresses “a compression ring” and “compression” in that it pulls upwardly. A compression force is a force from below or outwardly which is not how the sling function. In regard to claim 22 no fastening means on a garment or a garment itself has been claimed in combination with the sling and suspension means. In claim 20, lines 4 and 8 include the terms “displaceable or deformable” and is indefinite as stated above in regard to claim 19. In claim 31, line 5 the sling is stated as being

Art Unit: 3765

retained by “compression” but no structure has been claimed to provide the “compression”.

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the compression ring and deformable material must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 3765

The many deletions and deficiencies under 35 USC 112 as stated above make the claims difficult to read and understand. The claims will be examined on their merits upon the receipt of a clean copy that clearly shows the claim language without the excessive lining through and underlining. in the next response.

Therefore this action is not being made final..
